breakfast symposium

Maintaining vaginal health: complexities in diagnosis and management

An update on the approach to managing common vaginal infections built upon a discussion of the diagnostic landscape in this area.

Date: Monday, July 15, 2019

Location: Meeting Room 1 & Foyer S, The Vancouver Convention Centre, East

Time: 7:00 a.m. – 8:00 a.m. local time (breakfast will be served*)

To attend: Register at ► go.bd.com/BD-STIHIV2019

Visit BD at booth 105 to learn more about our women's health diagnostic solutions focused on vaginitis, vaginosis, and sexually-transmitted infections.

Maintaining vaginal health: complexities in diagnosis and management

Symposium topics and speakers:

Diagnosics for women with discharge: including both vaginal and cervical causes

Assessing the cause of discharge in women is complicated by the potential for microbial community disruptions, vaginal infections, cervical infections or any combination of these. Diagnostics that support a full investigation of the underlying cause/s of discharge among women will be described.

Barbara Van Der Pol, PhD, MPH

Professor of Medicine | STD Diagnostics Lab Director | President, American STD Association
University of Alabama at Birmingham School of Medicine

Clinical management of vaginal syndromes

Despite decades of experience, our capacity to accurately manage vaginal disease is limited by the very slow pace of development of both diagnostic and therapeutic options. That said, there has been modest progress in the development of new or revisiting of established therapeutic interventions for this purpose. In this session, Dr. Marrazzo will provide an update on the approach to common vaginal infections, building on Dr. Van Der Pol's discussion of the diagnostic landscape in this area.

Jeanne Marrazzo, MD, MPH, FACP, FIDSA

Director, Division of Infectious Diseases | C. Glenn Cobbs, M.D., Endowed Professor in Infectious Diseases
University of Alabama at Birmingham School of Medicine
